

Collaborative e-platform for innovation and educational enhancement in medical engineering

Exciting Expansion in Healthcare Collaboration: Project CALLME Welcomes Prominent Medical Clinics and Companies

10th July 2023 - Project CALLME, a groundbreaking project focused on advancing healthcare innovations and solutions, is thrilled to announce the inclusion of several distinguished medical clinics and companies at the outset of the project. This expansion of our network marks a significant milestone in our mission to promote collaboration and foster innovation in the medical engineering sector across Europe.

Medical Clinics Joining Project CALLME

At the initiation of this ambitious project, we are pleased to introduce the following esteemed medical clinics that have become integral partners in our endeavor:

1. **Clinical Center Nis, Serbia:** A leading healthcare institution with a rich history of providing exemplary medical care to the people of Serbia.
2. **Clinical Center of Kragujevac, Serbia:** Renowned for its commitment to medical excellence and patient-centered care, this clinic is a welcome addition to the Project CALLME family.
3. **Dr. Feldman's Private Clinic in Riga, Latvia:** A prominent private healthcare facility in Latvia, offering specialized medical services and world-class expertise.

The inclusion of these clinics underscores Project CALLME's commitment to diversity and expertise within its collaborative network. As the project progresses, our dedicated team will actively seek opportunities to incorporate additional medical clinics from partner organizations and other EU countries, leveraging dissemination and promotional activities to further expand our reach.

Medical Companies Partnering with Project CALLME

In addition to the medical clinics, Project CALLME is delighted to introduce the following medical companies that have aligned their expertise and resources with our mission:

1. **Ortokon Nis, Serbia:** A leading manufacturer and provider of orthopedic solutions, contributing their innovative products and expertise to our project.
2. **Trafix Nis, Serbia:** A trusted name in the medical industry, specializing in medical equipment and devices, and a valuable addition to our network.

3. **MJ Mediscience, Larnaca, Cyprus:** A company dedicated to advancing medical science and technology, enriching Project CALLME with their forward-thinking approach.

As the project evolves, the Project CALLME team remains committed to broadening its horizons and involving further medical companies from our partner organizations and various EU countries. Dissemination and promotional efforts will play a pivotal role in facilitating this expansion, ensuring that our project continues to attract the brightest minds and most innovative solutions in the healthcare sector.

Project CALLME acknowledges that these partnerships with exceptional medical clinics and companies demonstrate the strength of our commitment to fostering collaboration and driving innovation in medical engineering.

About Project CALLME:

Project CALLME is a visionary project dedicated to promoting collaboration, innovation, and excellence in medical engineering solutions across Europe. By uniting leading medical clinics, companies, and experts, Project CALLME aims to advance medical engineering practices and technologies for the benefit of patients and healthcare providers alike. One important project objective is to form a knowledge triangle network that will enable interconnection between education, innovation, and business which should enable knowledge transfer and sustainability of the developed platform, primarily in medical engineering, and to provide capabilities for constant upgrade of learning techniques by using NEM and STEM methodology.
